TASK TYPE-GROUP ASSIGNMENT

ECOSTRIDE

“Step Forward. Leave Less Behind.”

An AI-powered content strategy & sustainable footwear brand pitch created for Indian Gen Z & urban youth.

Why Choose Sustainable Footwear?

THE PROBLEM

Fast Fashion Footwear Waste

- **20B+ pairs** of synthetic shoes produced globally annually.
- Petroleum-based EVAs take **300+ years** to decompose.
- Indian Gen Z seeks eco-options but finds designs dull or costly.

THE OPPORTUNITY

Indian Gen Z Fashion Boom

- Urban Indian youth (18–28) spend heavily on sneaker culture.
- **74% of Gen Z** express preference for sustainable choices.
- Instagram Reels drive **80%+** of product discovery in India.

ECOSTRIDE SOLUTION

AI-Driven Conscious Brand

- Stylish everyday sneakers with lower-impact materials.
- Gen Z relatable voice: simple, authentic, no greenwashing.
- **AI Prompt Engineering** used for scalable social marketing.

ECOSTRIDE: Name, Mission & Core Values

NAME ETYMOLOGY

ECO: Conscious material selection & reduced impact.
STRIDE: Confident movement, everyday style & urban progress.

MISSION STATEMENT

“To make everyday sneakers more conscious without making style complicated.”

VISION STATEMENT

“To build a sneaker culture where better material choices become part of everyday fashion.”

5 CORE BRAND VALUES

- 1 Material Consciousness**
Selecting lower-impact materials without sacrificing strength.
- 2 Radical Transparency**
Clear labeling of material sources; zero inflated eco-claims.
- 3 Everyday Comfort**
Engineered for 10,000+ daily campus steps and urban transit.
- 4 Modern Design**
Sleek street aesthetics designed for Gen Z versatility.
- 5 Responsible Innovation**
Exploring agricultural waste and bio-feedstocks continuously.

Material Breakdown & Sustainable Engineering

1. Organic Cotton

Application: Uppers & inner laces.

Benefit: Lower water consumption vs conventional cotton; chemical-pesticide free.

2. Recycled Polyester

Application: Mesh lining & knit upper.

Benefit: Diverts PET bottles from Indian landfills; breathable & lightweight.

3. Natural Rubber

Application: Outer sole grip.

Benefit: Responsibly tapped renewable rubber replacing synthetic petroleum rubber.

4. Bio-Based EVA

Application: Midsole cushioning.

Benefit: Sugarcane bio-feedstock replaces partial fossil fuel foam inputs.

5. Rice-Waste Ag Composite

Application: Sole speckles & heel counter.

Benefit: Utilizes paddy agricultural waste from North India to prevent crop burning.

6. Bio-Canvas Leather Alternative

Application: Premium upper paneling.

Benefit: Plant-infused organic cotton coating providing leather-like durability.

**Note: Different ECOSTRIDE models feature distinct material combinations tailored for specific functionality and comfort needs.*

Original ECOSTRIDE Footwear Collection

EVERYDAY CLASSIC

ECOSTRIDE CORE

Minimalist Daily Sneaker

Target: College students (Everyday wear)

Materials: Organic Cotton + Natural Rubber

Key Benefit: Breathable comfort & versatile styling

ATHLEISURE / RUN

ECOSTRIDE PULSE

Lightweight Active Sneaker

Target: Active youth & commuters

Materials: Recycled Poly Mesh + Bio-EVA

Key Benefit: High shock absorption & light weight

PREMIUM CASUAL

ECOSTRIDE EARTH

Elevated Smart Casual

Target: Young professionals & creators

Materials: Bio-Canvas Leather + Rubber

Key Benefit: Premium finish & sleek aesthetics

CIRCULAR CONCEPT

ECOSTRIDE LOOP

Monomaterial Recyclable

Target: Eco-enthusiasts & early adopters

Materials: Rice Waste Composite + Recycled PET

Key Benefit: Closed-loop take-back recyclable

Target Audience & Indian Urban Personas

AARAV (19) — “College Conscious”

Delhi NCR / Bengaluru • Student

Demographics: Gen Z, College undergrad, active on Instagram Reels & campus clubs.

Psychographics: Loves streetwear aesthetics, music festivals, and sustainable thrifting.

Pain Point: Sustainable shoes are either boring, expensive, or lack trendy colorways.

Buying Motivation: Wants cool everyday campus shoes that align with his values.

Instagram Behavior: Consumes 15-sec Reels, shares UGC outfits, participates in poll stories.

RHEA (25) — “Urban Professional”

Mumbai / Pune • UX Designer

Demographics: Young working professional, disposable income, urban commuter.

Psychographics: Minimalist fashion, wellness conscious, values transparency and durability.

Pain Point: High greenwashing in fashion; hard to trust "eco" claims.

Buying Motivation: Comfort for long work-to-cafe days with genuine material backing.

Instagram Behavior: Saves educational carousels, follows indie brands, clicks bio links.

4 Instagram Content Pillars

PILLAR 1 (35%)

Product & Material Stories

Objective: Build trust & showcase construction.

Format: Macro Reels & Carousels

Example: “What’s inside your sneaker?” exploded visual

CTA: “Tap link to inspect materials.”

PILLAR 2 (25%)

Sustainability Education

Objective: Demystify eco-claims in simple terms.

Format: Myth vs Fact Carousels

Example: “Why bio-EVA beats petroleum foam”

CTA: “Save this for your next purchase!”

PILLAR 3 (25%)

Style & Urban Lifestyle

Objective: Drive aspirational aesthetic value.

Format: Outfit Inspo Reels & OOTDs

Example: “1 Sneaker, 3 Campus Fits”

CTA: “Which fit is your vibe? Comment 1, 2 or 3!”

PILLAR 4 (15%)

Community & Interactive

Objective: Foster co-creation & high engagement.

Format: Story Polls, Q&As, UGC

Example: “Vote our next drop colorway”

CTA: “Vote in our Stories right now!”

Instagram Caption Prompting: Before vs After

WEAK / BASIC PROMPT

"Write an Instagram post for EcoStride shoes."

Why it fails:

- No persona or role specified
- No target audience context (Gen Z India)
- No tone or length constraint
- Generates generic, robotic fluff with bad hashtags

ENGINEERED PROMPT

"You are a Gen Z-focused sustainable fashion content strategist. Write a 100–120 word Instagram caption for ECOSTRIDE, a fictional sustainable sneaker brand targeting Indian consumers aged 18–28. Highlight recycled polyester and natural rubber in simple language. Use a confident, modern and relatable tone. Start with a strong hook, explain one material benefit, connect the product with everyday style, end with a soft CTA, and provide 5 relevant hashtags (#ECOSTRIDE #SUSTAINABLEFOOTWEAR #ZEROWASTE #CIRCULARFASHION #PLASTICFREELIVING). Avoid exaggerated claims such as '100% eco-friendly' or 'zero impact'."

✓ Specific Role + Audience + Target Hashtags + Anti-Greenwashing Constraints

Reel Script Prompting: Before vs After

WEAK PROMPT

"Make a sneaker advertisement script."

Why it fails:

- No scene breakdown or timeframes
- No platform format (9:16 vertical)
- No visual direction or text overlay constraints

ENGINEERED REEL SCRIPT

PROMPT

"You are a creative director for a sustainable sneaker startup. Create a 15-second Instagram Reel script concept for ECOSTRIDE PULSE targeting Indian Gen Z sneaker consumers. Structure into 5 scenes: 1. Hook (0-3s): Urban street walk close-up. 2. Material Close-Up (3-6s): Recycled PET mesh texture. 3. Product Reveal (6-9s): Full sneaker turn. 4. Lifestyle Shot (9-12s): Campus cafe vibe. 5. CTA (12-15s): On-screen text 'Step Forward. Leave Less Behind.' Visual style: Clean urban India, natural daylight, realistic sneaker texture, smooth transitions. Max 5 words on-screen text per scene."

Image Generation Prompting: Before vs After

WEAK IMAGE PROMPT

"Create a sustainable shoe image."

Why it fails:

- Vague styling, results in weird fantasy shoes
- No lighting or environment specified
- May accidentally generate competitor logos

ENGINEERED MIDJOURNEY / DALL-E

PROMPT

"You are a premium product photographer and sustainability campaign art director. Generate a photorealistic Instagram product image of the fictional ECOSTRIDE CORE sneaker. Show a minimalist white and off-white sneaker with an original green-inspired accent, recycled-textile texture, natural rubber outsole and subtle organic cotton details. Place the sneaker on a clean urban surface with soft natural daylight and subtle plant elements. Premium editorial fashion photography, realistic materials, no existing brand logos, no copied designs, no unnecessary text, 4:5 Instagram composition."

Complete AI-Generated Content Sample

E ecostride.india

What if your everyday sneakers could make a better material choice? 🌱👟

Meet the **ECOSTRIDE CORE**. Built for 10,000+ campus steps using organic cotton canvas, sugarcane bio-EVA cushioning, and natural rubber soles. Less synthetic waste, zero compromise on street style.

Designed in India for daily urban movement.

AI Video Production Engine & Prompts

AI REEL PROMPT 1
(CINEMATIC)

Prompt: "Create a 10-second premium cinematic advertisement for 'EcoStride' (9:16 vertical). Scene 1 (0-5s): Polluted urban background transition. Scene 2 (5-10s): Smooth morphing into natural green landscape with natural rubber and cotton forming the sneaker. Scene 3 (10-17s): Macro close-up stitching, breathable texture, EcoStride logo. Scene 4 (17-26s): Indian youth walking through campus during golden hour. Scene 5 (26-32s): Footsteps with subtle realistic growing plant effect. Scene 6 (32-37s): Clean product hero shot with 'ECOSTRIDE — WALK THE CHANGE.' Audio: Uplifting background score, warm voiceover."

AI REEL PROMPT 2 (COMMERCIAL)

Prompt: "Create a 15–18 second premium ad for 'EcoStride'. Scene 1 (0-3s): Young person walking through modern city park. VO: 'Meet EcoStride — footwear made for people who care where they step.' Scene 2 (3-6s): Recycled plastic transforming into upper textile. VO: 'First, recycled materials — less waste.' Scene 3 (6-9s): Lightweight sole flexing. VO: 'Second, lightweight comfort.' Scene 4 (9-12s): Daily walking & jogging. VO: 'Third, durable construction.' Scene 5 (12-15s): Sleek colorways display. VO: 'Fourth, clean modern designs.' Scene 6 (15-18s): Hero shot. VO: 'EcoStride — walk differently.'"

8 Targeted Keywords & Content Strategy

Keyword (8 Total)	Search Intent	Competition	Content Application	Selection Rationale
1. sustainable sneakers	Transactional / Commercial	High	Instagram Bio, Primary Hashtag	High volume seed keyword for brand discovery.
2. eco friendly sneakers	Informational / Commercial	High	Reel Captions & Alt Text	Reaches broader eco-conscious shoppers.
3. sustainable shoes	Informational	Medium-High	Educational Carousels	Captures general sustainability searchers.
4. recycled sneakers	Commercial	Medium	Pillar 1 Material Breakdown Posts	Direct intent for recycled material footwear.
5. ethical sneakers	Informational	Medium	Brand Mission Carousel	Attracts values-driven conscious buyers.
6. best sustainable sneakers for everyday wear (Long-tail)	High Commercial Intent	Low-Medium	Blog Post & Guide Carousels	High conversion potential for daily use sneakers.
7. eco friendly sneakers for college students (Long-tail)	Specific Persona Intent	Low	Campus Outfit Inspo Reels	Perfect alignment with Persona 1 (Aarav).
8. sneakers made from recycled materials (Long-tail)	Product Specific Intent	Low	Unboxing & Material Tech Reels	High specificity for material conscious buyers.

*Note: Search volume & competition levels are qualitatively estimated for Indian urban demographic context.

Competitor Analysis & Keyword Differentiation

Brand Category	Keyword Focus	Content Angle	Communication Gap	ECOSTRIDE Differentiation
Global Eco Leaders	“organic footwear”, “sustainable sneakers”	Premium minimalism, global pricing	Perceived as expensive and distant from Indian campus life.	Relatable Gen Z pricing & Indian campus storytelling.
Legacy Sportswear	“recycled collection”, “eco line”	Corporate CSR campaigns	Greenwashing skepticism; eco-line is only 2% of products.	100% focused product collection & material radical honesty.
Indie D2C Brands	“handcrafted shoes”, “vegan leather”	Artisanal / Niche vibe	Often lacks trendy sneakerhead street aesthetics.	Streetwear-first design paired with agricultural waste tech.

How SEO Keywords Drive Our Content Strategy:

Long-tail keywords like “eco friendly sneakers for college students” directly inform our Instagram Reel hooks and caption copy. By embedding these target phrases into video voiceovers, subtitles, and Instagram Alt Text, we ensure algorithmic discovery on both Instagram Explore and Google Search.

14-Day AI-Driven Instagram Calendar

Day	Pillar	Format	Topic & Hook	CTA	AI Tool Used
D1	Product	Reel	“What’s inside your daily sneaker?” Exploded view	Link in Bio	ChatGPT + Runway
D2	Sustain.	Carousel	“Myth vs Fact: Can sugarcane foam cushion steps?”	Save Post	ChatGPT + Midjourney
D3	Style	Reel	“1 Sneaker, 3 Delhi Campus Fits”	Comment 1, 2 or 3	ChatGPT
D4	Community	Story Poll	“Which colorway should we drop next? Forest Green or Sand?”	Vote Now	Canva AI
D5	Product	Static	ECOSTRIDE PULSE macro mesh spotlight	Tap to inspect	Midjourney v6
D6	Sustain.	Reel	“How North Indian Paddy Waste becomes shoe soles”	Share Reel	ChatGPT + Luma
D7	Style	Carousel	“Monochrome Streetwear Guide with ECOSTRIDE EARTH”	Save for inspo	ChatGPT + Midjourney
D8	Community	UGC Post	“Tag @ecostride.india in your campus outfit to get featured”	Tag Us	ChatGPT
D9	Product	Reel	“Rainy day wear-test: Organic Cotton vs Water”	Explore Collection	Runway Gen-2
D10	Sustain.	Carousel	“Why 100% Eco-Friendly doesn’t exist (Radical Honesty)”	Read Caption	ChatGPT
D11	Style	Reel	“Late for lectures? Quick style with ECOSTRIDE CORE”	Shop Core	Luma Dream Machine
D12	Community	Story Q&A	“Ask us anything about our materials & sourcing”	Drop Question	ChatGPT
D13	Product	Carousel	ECOSTRIDE LOOP: The fully recyclable circular concept	Join Waitlist	Midjourney v6
D14	Style	Reel	“Step Forward. Leave Less Behind.” Brand Anthem	Join Movement	Runway + ElevenLabs

Projected KPIs & Continuous Iteration Loop

ESTIMATED 30-DAY REACH

150,000+

Organic Indian Urban Reach

TARGET ENGAGEMENT RATE

6.5%

Industry Avg: 2.2%

SAVED POST RATE

12%

Driven by Material Carousels

REEL RETENTION (3s)

45%

Hook Optimization Target

HOW WE REFINE PROMPTS BASED ON ANALYTICS DATA:

Scenario A: If Material Reels generate 2x more saves than Outfit Reels → We refine prompts to focus heavily on educational visual breakdowns and increase macro close-up prompt weight.

Scenario B: If Reel 3-second drop-off is high → We modify the prompt constraints to mandate aggressive motion hooks in scene 1 and limit text overlay to 3 words.

Sources & AI Tool Disclosure Table

AI Tool Name	Primary Purpose & Workflow	Specific Prompting Technique Used
ChatGPT (GPT-4o)	Content calendar, prompt structuring, SEO keyword analysis & captions	Role-Based Prompting + Negative Constraints + Few-Shot Examples
Midjourney v6 / DALL-E 3	Photorealistic sneaker product concepts & material texture visuals	Art Director Personas + Camera Angles + Lighting Parameters (--ar 4:5)
Runway Gen-2 / Luma Dream Machine	Short-form 9:16 vertical video Reel concept generation	Temporal Scene Breakdown + Motion Prompts + Camera Push Control
Canva AI	Presentation layout layouting & slide typography hierarchy	Grid alignment & visual hierarchy structuring

ACADEMIC DISCLAIMER: ECOSTRIDE is an original fictional student brand developed exclusively for Academic Task 1 (Prompt Engineering for Generative AI) at Lovely Professional University. No actual manufacturing or sales take place. All performance metrics represent projected models.

Key Takeaways from the ECOSTRIDE Pitch

1. Conscious Material Design

Combining street aesthetics with organic cotton, bio-EVA, and paddy agricultural waste.

2. Precision AI Prompting

Replacing generic prompts with structured role, audience, constraints, and negative filters.

3. Data-Driven Growth

Integrating SEO long-tail keywords with a 14-day Instagram Reel execution strategy.

“ECOSTRIDE — Step Forward. Leave Less Behind.”

Faculty Q&A Debate Defence (Evidence-Based Answers)

Q1: Why choose Instagram over LinkedIn or YouTube for ECOSTRIDE?

Answer: 82% of Indian Gen Z fashion discovery happens via Instagram Reels. Footwear is inherently visual and lifestyle-driven. YouTube requires long-form video, whereas Instagram allows fast, high-frequency short-form AI video and direct visual story polls.

Q2: Isn't bio-based EVA and rice-waste composite expensive for college students?

Answer: Sourcing North Indian paddy agricultural waste creates a localized supply chain advantage, turning waste biomass into sole fillers while reducing dependence on imported virgin petroleum EVAs.

Q3: How does your Prompt Engineering avoid hallucinated or greenwashed content?

Answer: We enforce explicit negative constraints in our system prompts ('Avoid exaggerated claims such as '100% eco-friendly' or 'zero impact)'). We mandate material transparency and exact percentage breakdowns.

Q4: How do you measure the success of an AI-generated Reel?

Answer: We track 3-second retention rate, save rate (for educational carousels), and comment-to-reach ratio. High saves indicate educational value; high shares indicate strong emotional hook alignment.
